

FACULTY EMAIL: BE SPARTAN GREEN STUDENT PROJECT FUND (water conservation and management)

Dear [INSERT PROFESSOR],

[MSU's Campus Sustainability department](#) is inviting your students to address some of the most pressing environmental issues in the world, right on campus, by conducting key research in various areas of sustainability.

Through the [Be Spartan Green Student Project Fund](#), undergraduate students, graduate students and student organizations can apply for up to \$5,000 in available funding to utilize MSU as a laboratory for developing solutions to these diverse and complex problems while also developing their professional proficiency with hands-on research experience.

With over 100 faculty members conducting water-related research in over 50 countries across the world, Spartans are actively committed to protecting one of our most valuable and most vulnerable natural resources. Through this program, your students have the opportunity to propose and investigate key solutions to critical issues like water accessibility, aging water infrastructure and distribution of water resources, using campus as site for research and innovation.

As you plan for fall and spring semester, consider how this program can support your course and your students. Please visit our [website](#) for examples of previously funded projects, the application process and project specifications. We thank you for your support and hope you will help us share this opportunity far and wide!

Sincerely,

XXX

FACULTY EMAIL: BE SPARTAN GREEN STUDENT PROJECT FUND (Waste reduction, reuse and recycling)

Dear [INSERT PROFESSOR],

[MSU's Campus Sustainability department](#) is inviting your students to address some of the most pressing environmental issues in the world, right on campus, by conducting key research in various areas of sustainability.

Through the [Be Spartan Green Student Project Fund](#), undergraduate students, graduate students and student organizations can apply for up to \$5,000 in available funding to utilize MSU as a laboratory for developing solutions to these diverse and complex problems while also developing their professional proficiency with hands-on research experience.

In an age defined by technology, the generation of countless new products and a rapidly growing population, the world is demanding solutions in urban design, supply chain efficiency and responsible waste management. By participating in this program, your students have the opportunity to propose and investigate sustainable solutions that balance modern consumerism with the limits of our physical environment, using campus as a site for research and innovation.

As you plan for fall and spring semester, consider how this program can support your courses and your students. Please visit our [website](#) for examples of previously funded projects, the application process and project specifications. We thank you for your support and hope you will help us share this opportunity far and wide!

Sincerely,
